#### **Instruction and Information Literacy Support**

Whether at main campus, ECBI, SWEC or online, librarians work with you to create individualized instruction sessions for your classes and programs. We also provide customized staff and community workshops about seeking and utilizing information.

Online instructional videos and online instruction can be customized to fit your needs. We'll help you bring library resources into your course pages. Please contact us with requests and suggestions for streaming video or other e-content that will help you and your students in online and off campus environments. Librarians also provide instructions at Education Center at Blue Island and Southwest Education Center (please arrange at least two weeks in advance).

The librarians can help you include information literacy (a MVCC general education objective) in your classes and workshops. We can help you plan assignments, create online resources and develop activities that you can implement yourself. We also provide student support at the reference desk and sessions for your class on avoiding plagiarism through proper APA and MLA citation and student copyright issues.
